Dr. P. A. Munz
Pomona College
Claremont, California

Dear Dr. Munz:-

As per your letter of the 10th. inst. I am sending you today by parcel post 449 botanical specimens. It will be alright to send the return plants this winter. While I am away from Denver my herbarium will remain at the Colorado State Museum, 14th. & Sherman Sts., Denver, Colorado so kindly send the plants to me there. In sending these plants please put in as many sedges as possible.

Our spending a winter in southern California is not given up, merely postponed. This last winter I spent at the Government Experimental Station at Iowa State College, Ames, Iowa taking some pathological work. Have decided to go there or someplace else for two years or more and take a Ph. D. After that I have no definite plans but it is quite possible that we may go to California then.

Very truly yours,

Ira W. Clokey
